

**ENVIRONMENTAL IMPACT ASSESSMENT FOR
PROPOSED DEVELOPMENT OF KUANTAN MARITIME HUB AT MUKIM SUNGAI KARANG,
KUANTAN, PAHANG DARUL MAKMUR**

FOCUS GROUP DISCUSSION

Date: 14 April 2017
Time: 10.30 am – 12.30 pm
Venue: Meeting Room, LKIM Kuantan
Attendance: See attached

MEETING NOTES

Name/ Agency	Feedbacks
Lembaga Kemajuan Ikan Malaysia (LKIM) Pahang	<p>Director of LKIM Pahang welcomed the attendees and introduced those invited were members of Board of Directors of the Kuantan Fishermen Association and community leaders which include Penghulu, Ketua Kampung and JKKK.</p> <p>It was indicated that the proposed project area is near common coastal fishing areas.</p> <p>Suggested that the consultant and project proponent follow up with local fishermen and villagers to gauge views and opinion on proposed development and expectations.</p>
Fishermen Leaders	<p>Fishermen were generally concern that reclamation and dredging works will disrupt their usual fishing areas.</p> <p>Fishermen mentioned compensation is required if project affects their fishing locations and activities.</p> <p>Fishermen shared that previously they only get RM20,000 compensation whereas their income is RM100,000 in that same location.</p> <p>It was confirmed that there were two “tukun’ (artificial reef) launched by LKIM near the proposed project site. These are breeding ground for fish and should not be disturbed.</p> <p>Fishermen leaders suggested that follow up with local fishermen to gauge views and opinion on proposed development and expectations.</p>
Community Leaders	<p>JKKK Kampung Baru Hj Omar shared that the waters near the project location (near Balok) are quite shallow which extends up to half mile after the shoreline. The reclamation will cause some erosion elsewhere, and also cause water pollution.</p> <p>Generally, concern if project may cause erosion to village near Sg Balok.</p> <p>No specific concern on Sg Pengorak as it only contains swamps and upstream have been blocked off after the development of Kuantan Port. No specific fishing activities there.</p> <p>If fishermen need to travel more than 70 km for productive fishing, the committee requested for a proper impact assessment on fishermen especially those with smaller boats.</p> <p>Assumed the proposed maritime hub is like Kuantan Port which means port limit where fishermen are not permitted to fish.</p> <p>Claimed that there is a fishing pond near the project site along the coastal area.</p>

Name/ Agency	Feedbacks
	Concern over road traffic impact along Jalan Tanjung Gelang. Suggested to have a copy of EIA report at Penghulu office for public review.
