	Executive Summary	i
	Ringkasan Eksekutif	lvi
1.0	Introduction	1-1
1.1	Project Title	1-1
1.2	Project Proponent	1-1
1.3	Environmental Consultants	1-1
1.4	Supporting Laboratories	1-6
1.5	Project Background	1-6
1.6	Legal Aspects	1-6
1.7	Objectives and Scope of the EIA Study	1-7
2.0	Terms of Reference	2-1
2.1	Introduction	2-1
2.2	Project Initiator	2-2
2.3	Project Consultants	2-2
2.4	Project Description	2-5
2.5	Scope of Project	2-5
2.6	Alternative Consideration	2-6
2.7	Significant Environmental Impacts & Study Boundaries	2-6
2.8	Assessment Standards & Methodologies	2-8
2.9	Consideration of Concurrent Projects	2-10
2.10	Study Timeline	2-10
2.11	Possible Mitigation Measures	2-11
3.0	Statement of Need	3-1
4.0	Project Options	4-1
4.1	Site Selection	4-1
4.2	No-Project Option	4-2
4.3	Sand Source Option	4-3
4.4	Structural Measures for Coastal Protection Option	4-4
4.4.1	Groyne	4-4
4.4.2	Seawall	4-4
4.4.3	Offshore Breakwater	4-5
4.4.4	Artificial Headland	4-5

<i>Chapter</i>	<i>Contents</i>	<i>Page</i>
4.4.5	Rock Revetment	4-6
4.5	Reclamation Method	4-6
4.5.1	Dry Method	4-7
4.5.2	Hydraulic Reclamation Method (Direct Dumping)	4-7
4.5.3	Rehandling Pit Method	4-8
4.5.4	Hydraulic Filling	4-8
4.5.5	Sand Spreading	4-9
5.0	Project Description	5-1
5.1	Location	5-1
5.2	Project Scope	5-1
5.3	Sand Source	5-2
5.4	Reclamation Works	5-2
5.4.1	Reclamation Method Statement	5-3
5.4.1.1	Site Possession and Site Preparation	5-3
5.4.1.2	Setting Out and Pre-Land Reclamation Survey	5-3
5.4.1.3	Transportation of Fill Material	5-3
5.4.1.4	Environmental Mitigation Works	5-4
5.4.1.5	Land Reclamation Works and Ground Treatment Works	5-5
5.4.1.6	Testing and Removal of Surcharge to Required Levels	5-6
5.4.1.7	Construction of Coastal Protection Structure	5-6
5.5	Infrastructure, Utilities and Amenities Requirement	5-7
5.5.1	Road Access	5-7
5.5.1	Drainage	5-7
5.5.1	Water Supply, Electricity Supply & Telecommunication Services	5-7
5.5.1	Waste Management	5-7
5.6	Implementation Schedule	5-7
6.0	Existing Environment	6-1
6.1	Introduction	6-1
6.2	Land Use	6-1
6.3	Meteorology	6-4
6.3.1	General	6-4
6.3.2	Rainfall	6-5

<i>Chapter</i>	<i>Contents</i>	<i>Page</i>
	6.3.3 Humidity	6-5
	6.3.4 Temperature	6-6
	6.3.5 Wind Characteristics	6-7
6.4	Coastal Environment	6-7
	6.4.1 Bathymetry Survey	6-8
	6.4.2 Wind and Waves	6-8
	6.4.3 Tides	6-9
	6.4.4 Current Measurement	6-10
	6.4.5 Water Level	6-10
	6.4.6 Seabed Sediment Sampling	6-10
	6.4.7 Total Suspended Sediment Sampling	6-13
6.5	Water Quality	6-14
	6.5.1 Water Sampling Methodology	6-15
	6.5.1.1 Seawater Quality	6-15
	6.5.1.1 Stream Water Quality	6-16
	6.5.2 Baseline Water Quality Result	6-17
	6.5.2.1 Seawater Quality	6-30
	6.5.2.2 River Water Quality	6-36
6.6	Ambient Air Quality	6-40
6.7	Noise Level	6-41
6.8	Socio-economy	6-43
	6.8.1 Socio-economic and Demographics of the Districts and Mukim located within and Surrounding the Project Site	6-43
	6.8.1.1 Population and Ethnic Composition	6-44
	6.8.1.2 Gender Distribution	6-47
	6.8.1.3 Households and Living Quarters Distribution	6-47
	6.8.1.4 Population and Age Group	6-48
	6.8.1.5 Dependency Age Ratio	6-50
	6.8.2 Socio-economic and Demographic Profiles of the Local Communities Surveyed	6-51
	6.8.3 Health Data of the Surrounding Community	6-55
6.9	Marine Traffic and Navigation	6-55
	6.9.1 Existing Marine Traffic Procedures and Safety Rules	6-55
	6.9.1.1 Mandatory Ship Reporting System (STRAITREP)	6-55
	6.9.1.2 Existing Navigation of Nearby Port: Melaka Port	6-57
	6.9.2 Information of Nearby Jetties/Ports	6-58
	6.9.2.1 Melaka Port	6-58

<i>Chapter</i>	<i>Contents</i>	<i>Page</i>
	6.9.2.2 Umbai Jetty	6-60
	6.9.2.3 Anjung Batu Jetty	6-60
6.9.3	Other Pertinent Information	6-61
	6.9.3.1 Jeti Nelayan Pantai Siring	6-61
	6.9.3.2 Present Traffic Scenario in the Proposed Project Area	6-61
6.10	Marine Ecology, Fisheries and Aquaculture	6-63
6.10.1	Scope of Work	6-63
6.10.2	Methodology	6-63
	6.10.2.1 Biological Productivity	6-63
	6.10.2.2 Fish Fauna Assessment	6-68
	6.10.2.3 Marine Habitat	6-70
	6.10.2.4 Fisheries and Aquaculture Assessment	6-77
6.10.3	Findings	7-79
	6.10.3.1 Marine Ecology	6-79
	6.10.3.2 Fish Fauna	6-105
	6.10.3.3 Marine Habitat	6-112
	6.10.3.4 Fisheries and Aquaculture Assessment	6-150
6.11	Road Network and Traffic Volume	6-166
6.11.1	Traffic Volume	6-167
7.0	Evaluation Of Impacts	7-1
7.1	Introduction	7-1
7.2	Hydraulic and Hydrodynamics	7-2
7.2.1	Impact on Hydrodynamic Condition	7-2
	7.2.1.1 Impact on Current Speed	7-2
	7.2.1.2 Impact on Water Level	7-3
	7.2.1.3 Impact on Wave Condition	7-3
	7.2.1.4 Impact on Mud Transport	7-4
7.2.2	Sediment Plume Dispersion Pattern	7-4
7.2.3	Cumulative Hydraulic Impact Assessment With All Other Proposed Reclamation Projects Nearby	7-5
7.2.4	Hydraulic Impact Assessment on Pulau Menatang	7-6
7.3	Hydrology	7-7
7.3.1	Impact to Nearby Rivers (Sg. Punggor & Sg. Umbai)	7-7
7.3.2	Kg. Pernu Drainage Assessment Before and After Reclamation	7-10
7.4	Waste Generation	7-12

<i>Chapter</i>	<i>Contents</i>	<i>Page</i>
	7.4.1 Solid Waste	7-12
	7.4.2 Scheduled Waste	7-13
7.5	Water Quality Assessment	7-15
	7.5.1 Turbidity / Suspended Solids	7-16
	7.5.2 Oil & Grease	7-18
	7.5.3 Wastes (Solid Wastes, Effluents and Wastewater)	7-19
	7.5.4 Nutrients	7-20
	7.5.5 Heavy Metals	7-20
7.6	Air Quality	7-21
	7.6.1 During Construction Phase	7-21
	7.6.2 Post-Reclamation Phase	7-22
7.7	Noise Level	7-22
	7.7.1 During Construction Phase	7-22
	7.7.2 Post-Reclamation Phase	7-22
7.8	Land Traffic	7-23
	7.8.1 During Construction Phase	7-23
	7.8.2 Post-Reclamation Phase	7-23
7.9	Marine Traffic	7-23
	7.9.1 During Pre-Reclamation Phase	7-23
	7.9.2 During Reclamation Phase	7-24
	7.9.3 During Post-Reclamation and Development Phase	7-26
7.10	Social Impact Assessment (SIA)	7-26
	7.10.1 Level of Awareness and Acceptance of the Project	7-26
	7.10.2 Perception of Project Planning Process	7-28
	7.10.3 Perceived Impacts During Construction and Implementation of Project	7-31
	7.10.4 Perceived Impacts During The Operation Phase	7-33
7.11	Economic Valuation of Impacts	7-34
	7.11.1 Objective	7-35
	7.11.2 Methodology	7-35
	7.11.3 Valuation of Significant Change in Environmental Services	7-37
	7.11.4 Loss of Mudflat Due to Reclamation	7-39
	7.11.5 Impact of Income on Fishermen	7-41
	7.11.5.1 Additional Fuel Cost to be Borne by Fishermen	7-42
	7.11.5.2 Additional Maintenance Cost for Repairing Nets and Boat Engine	7-44
	7.11.5.3 Opportunity Cost of Fishermen	7-46

<i>Chapter</i>	<i>Contents</i>	<i>Page</i>
7.11.6	Economic valuation for Middlemen, Mussel Aquaculture and Restaurant	7-49
7.11.7	Estimation of Anglers Travel Cost	7-56
7.11.8	Local livelihood - Willingness to Pay (WTP)	7-59
7.11.9	Total Net Present Value (NPV) for Economic Valuation	7-63
7.12	Marine Ecology, Fisheries & Aquaculture	7-65
7.12.1	Introduction	7-65
7.12.2	Impact on Marine Productivity	7-66
7.12.2.1	Plankton	7-66
7.12.2.2	Macrobenthos	7-73
7.12.2.3	Fish Fauna	7-74
7.12.3	Impact on Marine Habitat	7-76
7.12.3.1	Loss of Foreshore Area and mudflat as Fisheries Habitat	7-76
7.12.3.2	Mangrove	7-77
7.12.3.3	Coral Reef	7-77
7.12.3.4	Marine Turtles	7-78
7.12.4	Impact on Fisheries and Aquaculture	7-80
7.12.4.1	Loss of Fishing and Nursery Grounds	7-80
7.12.4.2	Impact on Mussel Farming	7-81
7.12.4.3	Impact on Recreational Fisheries	7-81
7.11	Abandonment	7-81
8.0	Mitigating Measures	8-1
8.1	Introduction	8-1
8.2	Hydraulic and Hydrodynamics	8-1
8.2.1	During Construction	8-1
8.2.2	Post Reclamation	8-2
8.3	Hydrology	8-3
8.3.1	During Construction	8-3
8.3.2	Post Reclamation	8-3
8.4	Waste Generation	8-4
8.4.1	Solid Waste	8-4
8.4.2	Scheduled Waste	8-5
8.5	Water Quality	8-6
8.5.1	Turbidity/ Suspended Solid	8-6
8.5.2	Oil & Grease	8-6
8.5.3	Wastes (Solid Wastes, Effluents and Wastewater)	8-8
8.5.4	Nutrients	8-8

<i>Chapter</i>	<i>Contents</i>	<i>Page</i>
8.6	Air Quality	8-8
	8.6.1 During Construction Phase	8-8
	8.6.2 During Operational Phase	8-10
8.7	Noise Level	8-10
	8.7.1 During Construction Phase	8-10
	8.7.2 During Operation Phase	8-11
8.8	Land Traffic	8-11
	8.8.1 During Construction Phase	8-11
	8.8.2 During Operation Phase	8-11
8.9	Marine Traffic	8-12
	8.9.1 During Pre-Reclamation Phase	8-12
	8.9.2 During Reclamation Phase	8-12
	8.9.3 During Post-Reclamation and Development Phase	8-15
8.10	Social Impact Assessment (SIA)	8-16
	8.10.1 Perceptions on How The Impacts of Project Can Be Mitigated	8-16
8.11	Marine Ecology, Fisheries and Aquaculture	8-19
	8.11.1 Introduction	8-19
	8.11.2 Marine Productivity and Marine Habitat	8-19
	8.11.2.1 Installation of Fish Aggregating Devices (FADs) for artisanal and recreational fishing	8-20
	8.11.2.2 Installation of Habitat Enrichment Infrastructure	8-20
	8.11.2.3 Sea Ranching to Enhance Coastal Food Chain/Web	8-25
	8.11.2.4 Fisheries Research Fund	8-25
	8.11.3 Marine Habitat	8-25
	8.11.3.1 Mangrove Replanting and Monitoring Programme	8-25
	8.11.3.2 Installation of Habitat Enrichment Devices	8-26
	8.11.3.3 Turtle Research Fund	8-27
	8.11.4 Fisheries and Aquaculture	8-27
	8.11.4.1 Suitable Compensation/Ex-gratia	8-27
	8.11.4.2 Ensuring that Fishermen access to Sea will not be Obstructed at Any Time	8-27
	8.11.4.3 Employment Opportunities	8-28
	8.11.4.4 Encourage Recreational Fishing by Providing Designated Areas for Anglers	8-28

<i>Chapter</i>	<i>Contents</i>	<i>Page</i>
8.12	Abandonment	8-28
9.0	Environmental Management Plan (EMP)	9-1
9.1	Environmental Monitoring Programme	9-2
9.1.1	Pre-Reclamation Phase	9-2
9.1.2	During Reclamation Phase	9-2
9.1.3	Post Reclamation Phase	9-4
9.2	Environmental Management Unit (EMU)	9-5
9.3	Emergency Response Plan (ERP)	9-6
9.4	Safety Plan (Standard Operating Procedure)	9-7
9.4.1	General Provisions	9-7
9.4.2	First Aid	9-7
9.4.3	Specific Vessel Emergency Instructions	9-7
10.0	Study Findings	10-1

List of Figures

<i>Figure</i>	<i>Contents</i>	<i>Page</i>
<i>Chapter 1</i>		
1.1	Location of the Project Site	1-6a
1.2	Overall Layout Plan	1-6b
1.3	Reclamation Areas Based On Rancangan Tempatan Daerah Melaka Tengah 2015	1-7a
<i>Chapter 2</i>		
2.1	Location of the Project Site	2-5a
2.2	Overall Layout Plan	2-5b
2.3	Rivers Nearby the Project Site	2-6a
2.4	Future Neighbouring Projects	2-10a
2.5	Hydraulic and EIA Study Timeline	2-10b
<i>Chapter 4</i>		
4.1	Mangroves Observed at the Project Site	4-1a
4.2	Coastal Erosion Level	4-1b
4.3	Seagrass, Coral Reef & Turtle Landing Spots In Melaka	4-2a
4.4	Sand Source Location	4-3a
4.5	Example of Groyne	4-4a
4.6	Example of Seawall	4-4b
4.7	Example of Offshore Breakwater	4-5a
4.8	Example of Artificial Headland	4-5b
4.9	Example of Hydraulic Filling	4-9a
4.10	Example of Sand spreading	4-10a
<i>Chapter 5</i>		
5.1	Road Network Surrounding the Project Site	5-1a
5.2	Navigational Route From Sand Mining Area to the Project Site	5-2a
5.3	Typical Construction Sequence For Land Reclamation Works	5-3a
5.4	Typical Design of a Silt Curtain	5-5a
5.5	Proposed Silt Curtain Position During Reclamation (Phase 1)	5-5b
5.6	Proposed Silt Curtain Position During Reclamation (Phase 2)	5-5c
5.7	Proposed Permanent Access	5-7a
<i>Chapter 6</i>		
6.1	Landuse Within 5km Radius	6-1a

<i>Figure</i>	<i>Contents</i>	<i>Page</i>
6.2	Summary of Meteorological Data	6-4a
6.3	Average Rainfall Amount and No. of Raindays in Melaka (Year 2015-2018)	6-4b
6.4	Wind Roses Diagram	6-7a
6.5	Wind Direction Sampling Location	6-7b
6.6	Results of Wind Direction at the Project Site	6-7c
6.7	Annual Wind Rose Plots at Project Site	6-8a
6.8	Annual Wave Rose Plots at Project Site	6-8b
6.9	Overview of the Tidal Elevation for Simulation Period at Study Area	6-9a
6.10	Locations of ADCPs Deployment	6-10a
6.11	Measured Current Speed for Station 1 and Station 2	6-10b
6.12	Measured Current Direction for Station 1 and Station 2	6-10c
6.13	Measured Water Level for Station 1 and Station 2	6-10d
6.14	Location for Seabed Sediment Collection around Project Area	6-10e
6.15	Spatial Analysis of Seabed Sediment D50 Result around Project Area	6-10f
6.16	Spatial Analysis of Seabed Sediment Composition around Project Area	6-10g
6.17	Total Suspended Sediment Sampling Points at Project Area	6-13a
6.18	Spatial Analysis of Total Suspended Sediment at Project Area	6-13b
6.19	Baseline Water Quality Monitoring Stations	6-14a
6.20	Air Quality Monitoring Location	6-40a
6.21	Noise Level Monitoring Location	6-41a
6.22	Location of Proposed Project area in the vicinity of Sector 4 of STRAITREP	6-56a
6.23	Melaka Port Limit and location of Proposed Project Area	6-57a
6.24	Real-time Image of Reclamation Area Taken on 14th September 2018.	6-61a
6.25	Traffic density image of the proposed project area in 2017	6-61b
6.26	Location of Sampling Station for Plankton and Macro-benthos (S1 – S20)	6-64a
6.27	Location of the Sampling Stations for Fish Fauna Assessment (F1-F5)	6-68a
6.28	Location of the Transects for Mangrove Assessment	6-70a
6.29	Location of the Dive Sites at the Study Area	6-74a
6.30	Mangrove Forest in Melaka	6-113a
6.31	Mangrove Forest in Melaka	6-114a
6.32	Location of Coral Reefs at Melaka	6-119a

<i>Figure</i>	<i>Contents</i>	<i>Page</i>
6.33	Location of Coral Survey Transect Lines at the Study Area	6-119b
6.34	Fish Landing Points Within 5km Radius of the Proposed Reclamation Site	6-151a
6.35	Location of Mussel Farming Areas at the Study Area	6-160a
6.36	Traffic Census Station	6-167a
Chapter 7		
7.1	Scenario A and B with Bathymetry	7-2a
7.2	Mean Extent of Sediment Plume Dispersion from the Proposed Reclamation Work during Neap Tide with and without Silt Curtain at All Sources	7-5a
7.3	Mean Extent of Sediment Plume Dispersion from the Proposed Reclamation Work during Spring Tide with and without Silt Curtain at All Sources	7-5b
7.4	Approved Nearby Reclamation Projects	7-5c
7.5	Comparison of Mean Current Speed, Minimum and Maximum Water Level and Wave at Yayasan Melaka Reclamation Area and Approved Hydraulic Study Area	7-5d
7.6	Location of Pulau Menatang	7-6a
7.7	River Network Surrounding the Study Area	7-7a
7.8	Kg. Pernu Outlet Drain	7-10a
7.9	Kampung Pernu Catchment Area and Discharge Outlet	7-10b
7.10	Long Section for Kg. Pernu Discharge Outlet	7-10c
7.11	Current Flow Comparison Before and After Reclamation	7-11a
7.12	Current Flow and Water Level Comparison Before and After Reclamation at Kampung Pernu	7-11b
7.13	Mean Extent of Sediment Plume Dispersion from the Proposed Reclamation Work during Neap Tide With and Without Silt Curtain at All Sources	7-17a
7.14	Mean Extent of Sediment Plume Dispersion from the Proposed Reclamation Work during Spring Tide With and Without Silt Curtain at All Sources	7-11b
7.15	Construction Access	7-23a
7.16	The Common Fishing Ground and the Distance Route Used by Local Fishermen	7-41a
7.17	Location of the Mangroves Transect Lines at the Study Area	7-77a
7.18	Location of Coral Survey Transect Lines at the Study Area	7-77b

<i>Figure</i>	<i>Contents</i>	<i>Page</i>
Chapter 8		
8.1	Proposed Silt Curtain Position During Reclamation (Phase 1)	8-1a
8.2	Proposed Silt Curtain Position During Reclamation (Phase 2)	8-1b
8.3	Shoreline Monitoring Survey Planline	8-2a
8.4	Tyre Washing System	8-9a
8.5	Examples of FADs for Artisanal and Recreational Fishing	8-20
8.6	Examples of Shoreline Stabilization by Mangrove Planting	8-24
8.7	Examples of Shoreline Stabilization by Coastal Vegetation	8-24
Chapter 9		
9.1	Proposed River Water, Air Quality and Noise Level Monitoring Locations	9-3a
9.2	Proposed Environmental Management Unit	9-5a

List of Tables

<i>Table</i>	<i>Contents</i>	<i>Page</i>
<i>Chapter 1</i>		
1.1	List of EIA Team Members	1-3
<i>Chapter 2</i>		
2.1	List of EIA Team Members	2-3
2.2	Potential Impacts	2-6
2.3	Summary of Assessment Standards & Methodologies	2-8
2.4	Possible Mitigation Measures	2-11
<i>Chapter 4</i>		
4.1	Site Selection Criteria	4-1
4.2	Comparison of “No – Project” and “With – Project” Options	4-2
4.3	Advantages and Disadvantages of Rock Revetment	4-6
<i>Chapter 5</i>		
5.1	Detailed Cyclic Time for One Trip of TSHD From Sand Mining Area to Sand Filling Area	5-4
<i>Chapter 6</i>		
6.1	Land Use within 5km Distance from The Site	6-1
6.2	Summary of Meteorological Data For Melaka From 1968 – 2014 (47 years)	6-6
6.3	Average Rainfall Amount and the Number of Raindays from 2015 – 2018	6-7
6.4	Mean Annual Wind Speed	6-8
6.5	Mean Annual Wave Heights	6-9
6.6	Datum Differential	6-9
6.7	Summary of Particle Size around Proposed Project Area	6-9
6.8	Location and the Results of Total Suspended Sediment Sampling	6-11
6.9	Description of Baseline Sampling Points	6-13
6.10	Details of Water Quality Sampling	6-14
6.11	Parameters Tested for Water Quality	6-17
6.12	Baseline Seawater Quality Results	6-20
6.13	Baseline Stream Water Quality Results	6-28
6.14	Classification of Malaysian Marine Water Quality Standards	6-30

<i>Table</i>	<i>Contents</i>	<i>Page</i>
6.15	Classes and Uses of National Water Quality Standard	6-37
6.16	Description of Ambient Air Quality Monitoring Stations	6-40
6.17	Result of Ambient Air Quality Monitoring	6-40
6.18	The Coordinate and Description of Noise Monitoring Locations	6-41
6.19	The Summary of Average Readings of LAeq	6-42
6.20	Total Population of Melaka State, Melaka Tengah and Jasin Districts and the mukims within these districts	6-44
6.21	The racial distribution of Melaka State, Melaka Tengah District and Jasin District and the relevant mukims within these districts	6-46
6.22	Population distribution in Melaka State, Melaka Tengah and Jasin Districts and Relevant Mukims, 2010 by Gender	6-47
6.23	Number of Households and Living Quarters in Melaka State, Melaka Tengah District, Klebang Besar Mukim	6-48
6.24	Distribution of population age group at the state, district and mukim, 2010	6-49
6.25	Dependency Ratios in the Melaka State, Melaka Tengah and Jasin Districts and Relevant Mukims	6-50
6.26	Demographic Characteristics of the local communities surveyed	6-51
6.27	Socio-economics Characteristics of the Local Communities Surveyed	6-53
6.28	Dengue Cases at the Surrounding of the Project Site	6-55
6.29	Assigned VHF Channels for Sectors in STRAITREP	6-56
6.30	Format of ship report	6-56
6.31	Melaka Port Facilities	6-59
6.32	Storage and Warehousing at Melaka Port	6-59
6.33	Total Cargo Throughput (FWT) in Melaka Port, 2012 - 2016	6-59
6.34	Total Number of Ship Calling by Types at Melaka Port, 2013 to May 2017	6-60
6.35	Schedule of Marine Transport Services at Anjung Batu Jetty	6-61
6.36	Description of Sampling Stations for Phytoplankton, Zooplankton and Macrobenthos Assessment (S1 – S20)	6-64

<i>Table</i>	<i>Contents</i>	<i>Page</i>
6.37	Description of the Sampling Points for Fish Fauna Assessment	6-68
6.38	Description of the Transects for Mangrove Assessment	6-71
6.39	Description of the Dive Sites for Coral Reef Assessment	6-75
6.40	Location of the Fish Landing Points within the Impact Zone	6-77
6.41	Phytoplankton Density (cells/mL) at Study Area	6-81
6.42	Zooplankton Density (ind./L) and Diversity (H') at the Study Area	6-89
6.43	Macrobenthos Density (ind./m ²) and Diversity (H') at the Study Area	6-97
6.44	Summary of Fish Caught at Study Area	6-106
6.45	List of Mangrove Species Found at the Study Area	6-115
6.46	List of Coral Reefs Recorded at the Study Area	6-120
6.47	List of Fish Recorded at the Study Area	6-136
6.48	List of Invertebrates Recorded at the Study Area	6-139
6.49	List of Seaweeds Recorded at the Study Area	6-143
6.50	Hawksbill Turtle Landings along the Melaka Coastline, 2017	6-148
6.51	List of Fish Landed in Melaka, 2017	6-151
6.52	No. of Fishermen According to Ethnicity at Study Area, 2017	6-153
6.53	No. of Fishing Vessel Recorded at the Study Area, 2017	6-154
6.54	Shore-based Angling Effort at the Study Area	6-163
6.55	Boat-based Angling Effort at the Study Area	6-164
6.56	Kelong-based Angling Effort at the Study Area	6-165
6.57	Estimation of the Total Economic Value at the Study Area	6-166
6.58	Traffic Volume and Annual Traffic Growth Rate for Year 2015	6-167
 Chapter 7		
7.1	Comparison For Mean Current Speed In The Project Area	7-3
7.2	Comparison For Minimum and Maximum Water Levels in the Project Area	7-3
7.3	Comparison For Significant Wave Heights and Mean Wave Direction in Project Area	7-4
7.4	Flow in the Punggor – Umbai River Catchment For Different ARI	7-7

<i>Table</i>	<i>Contents</i>	<i>Page</i>
7.5	Impacts on Water Quality	7-15
7.6	Projected Wasteloads under Construction Scenario	7-19
7.7	Level of Awareness of the Communities on the Project	7-27
7.8	Perceptions on the Benefits of the Project among the Communities	7-27
7.9	Level of Acceptance of the Project among the Communities	7-28
7.10	Locals' Engagement With Project Proponent	7-28
7.11	Sources of Information on the Project	7-29
7.12	Feedback Channel Availability	7-30
7.13	Local Channel to Provide Feedbacks Regarding The Project	7-30
7.14	Locals Level of Wariness Regarding The Project	7-31
7.15	Local Community's Reasons For Wariness	7-31
7.16	Local Community Perception On The Impacts of the Project During Construction	7-32
7.17	Local Community's Perceptions On The Impacts of the Project During Operation Phase	7-34
7.18	Environmental Issues Potentially Affected by the Proposed Project	7-38
7.19	Estimated Value of Environmental Services (per hectare per year) From Mudflats in Malaysia	7-40
7.20	Numbers of Outboard Engine Boats Operating Within The Project Zone	7-42
7.21	The Fuel Usage According to Different Engine Horsepower	7-43
7.22	Total Incremental Fuel Cost (RM/month)	7-44
7.23	The Breakdown of Maintenance Cost For The Fisherman	7-45
7.24	Details Regarding Fish Landing By Species	7-47
7.25	Average Annual Catch and Value per Hours According to Different Species.	7-48
7.26	The Opportunity Loss From Increment of Working Hour by Fishermen.	7-49
7.27	The Numbers of Possible Impacted Middleman, Mussel Aquaculture and Restaurant Owner	7-49
7.28	Computational Components For Increased Transportation Costs By Species Borne By Middlemen	7-51
7.29	Incremental Cost of Transportation For Middleman	7-52

<i>Table</i>	<i>Contents</i>	<i>Page</i>
7.30	Earning and Cost Structure of a Small Scale Mussel (Kupang) Aquaculture.	7-53
7.31	The Average Earnings and Cost Structure of a Range of Seafood Restaurants	7-55
7.32	The Net Economic Value For Restaurant Owners	7-55
7.33	Profile of Anglers	7-57
7.34	Estimated Semi logarithmic and Linear TGFs For Angling Within 5km Radius From Proposed Site	7-58
7.35	Consumer Surplus Estimates	7-58
7.36	Impact of Project On Angling Opportunities	7-59
7.37	The Population Breakdown by Affected Mukim	7-61
7.38	Sample Selection For Estimating WTP	7-62
7.39	Total of WTP	7-63
7.40	Economic Loss	7-63
7.41	Total NPV For Respective Discount Rate (8%, 6% and 4%)	7-64
7.42	Mean Current Speeds in Project Area	7-67
7.43	Typical Issues and Impacts During and After Rehabilitation and Abandonment Stage	7-82
Chapter 8		
8.1	Impacts and mitigation measures suggested during project construction	8-18
8.2	Impact issues and mitigation measures during project operational phase	8-19

Appendices

<i>Appendix</i>	<i>Title</i>
I	Terms Of Reference (TOR) Endorsement
II	Laporan Cadangan Pemajuan (LCP)
III	Comments From The Related Agencies
IV	Marine Traffic Assessment (MTA) Supporting Documents
V	Hydraulic Study Approval
VI	Matrix Assessment
VII	Ambient Air Quality Standard
VIII	Noise Limit Guideline
IX	Economic Valuation Cashflow
X	Approval And Permit For Sand Mining
XI	Bathymetry Survey
XII	Baseline Monitoring Report
XIII	Fisheries Assessment Supporting Documents
XIV	Rock Revetment Design
XV	List Of Compliance To TOR Comments
XVI	Public Dialogue
XVII	Layout Plan
XVIII	SIA Questionnaires
