	Page
Table of Contents	i
List of Appendices	vi
List of Abbreviations	vii
List of Figures	ix
List of Tables	xii
List of Charts	xvii

### SECTION 1 : INTRODUCTION

1.1	PROJECT TITLE	1-1
1.2	PROJECT LOCATION	1-1
1.3	PROJECT PROPONENT	1-2
1.4	PROJECT DELIVERY PARTNER	1-2
1.5	EIA CONSULTANT	1-3
1.6	LEGAL REQUIREMENT AND THE NEED FOR THE DEIA	1-3
1.7	OBJECTIVE AND SCOPE OF THE DEIA	1-4
1.8	APPROACH	1-4

### SECTION 2 : STATEMENT OF NEED

2.1	TRAFFIC CONGESTION - THE CHALLENGE OF THE FUTURE	2-1
2.2	GAPS IN PUBLIC TRANSPORT	2-1
2.2.1	Inadequate Rail Coverage	2-1
2.2.2	Insufficient Connectivity	2-2
2.3	GREATER KL/ KLANG VALLEY PUBLIC TRANSPORT MASTER PLAN	2-3
2.3.1	Improving Accessibility To Public Transport	2-3
2.3.2	Serving New Growth Areas and Better Connection to Established Areas	2-3
2.3.3	Proposed Rail Enhancements	2-4
2.4	THE ROLE AND BENEFITS OF KLANG VALLEY MRT	2-4
2.5	NATIONAL ECONOMIC TRANSFORMATION PROGRAMME	2-6

### SECTION 3 : PROJECT DESCRIPTION

3.1	INTRODUCTION	3-1
3.2	PLANNING AND DESIGN BASIS	3-1
3.3	KEY PROJECT COMPONENTS	3-2
3.3.1	Northern Elevated Segment (Damansara Damai – Jalan Ipoh)	3-2
3.3.2	Underground Segment (Jalan Ipoh– Bandar Malaysia South)	3-3
3.3.3	Southern Elevated Segment 1 (Bandar Malaysia South - UPM )	3-4
3.3.4	Southern Elevated Segment 2 (UPM - Putrajaya)	3-5
3.4	STATIONS	3-6
3.5	DEPOT	3-11

## TABLE OF CONTENTS

---

3.6	ROLLING STOCK	3-12
3.7	TRACK WORKS	3-16
3.8	SYSTEM OPERATION	3-17
3.8.1	Signalling and Train Control System	3-17
3.8.2	Traction Power Supply System	3-18
3.8.3	Communication & Central Control	3-18
3.8.4	Automatic Fare Collection System	3-19
3.8.5	Operation Control Centre	3-19
3.9	FEEDER BUSES AND PARK AND RIDE FACILITIES	3-20
3.10	CONSTRUCTION METHODS	3-23
3.10.1	Utilities Relocation	3-23
3.10.2	Viaduct Construction	3-24
3.10.3	Tunnel Construction	3-26
3.10.4	Elevated Station Construction	3-29
3.10.5	Underground Station Construction	3-30
3.10.6	Track Works	3-31
3.10.7	Depot Construction	3-32
3.10.7.1	Site Clearing	3-32
3.10.7.2	Earthworks	3-33
3.10.7.3	Construction of Buildings and Supporting Infrastructure and Utilities	3-33
3.11	PROJECT IMPLEMENTATION SCHEDULE	3-34

### SECTION 4 : PROJECT OPTIONS

4.1	INTRODUCTION	4-1
4.2	NO PROJECT OPTION	4-1
4.3	ALIGNMENT OPTIONS DURING THE FEASIBILITY STAGE	4-1
4.4	ALIGNMENT OPTIONS DURING THE PRELIMINARY DESIGN STAGE	4-2
4.4.1	Alignment Options Evaluation Criteria	4-3
4.4.2	Options for Location 1 : Damansara Damai to Kepong Sentral	4-4
4.4.3	Options for Location 2 : Jinjang to Batu	4-5
4.4.4	Options for Location 3 : Batu to Titiwangsa	4-7
4.4.5	Options for Location 4 : Titiwangsa	4-8
4.4.6	Options for Location 5 : Titiwangsa to Tun Razak Exchange	4-9
4.4.7	Options for Location 6 : Tun Razak Exchange (TRX) to Serdang	4-11
4.4.8	Options for Location 7 : Kuchai Lama	4-14
4.4.9	Options for Location 8 : Serdang to Putrajaya	4-15
4.5	TUNNELLING VS ELEVATED STRUCTURE OPTIONS	4-17
4.5.1	Transition Location – North	4-17
4.5.2	Transition Location – South	4-18

### SECTION 5 : EXISTING ENVIRONMENT

5.1	INTRODUCTION	5-1
5.2	TOPOGRAPHY	5-1
5.3	GEOLOGY, SUBSOIL AND GROUNDWATER	5-3
5.3.1	General Geology	5-3

## TABLE OF CONTENTS

---

5.3.1.1	Geology along the Northern Elevated Segment: Damansara Damai – Jalan Ipoh	5-4
5.3.1.2	Geology along the Underground Segment: Jalan Ipoh – Bandar Malaysia South	5-5
5.3.1.3	Geology along Southern Elevated Segment 1: Bandar Malaysia South - UPM	5-5
5.3.1.4	Geology along Southern Elevated Segment 2: UPM – Putrajaya	5-6
5.3.2	Soil Profiles	5-6
5.3.3	Groundwater	5-12
5.4	LAND USE	5-13
5.4.1	Land Use along the SSP Line	5-14
5.4.1.1	Northern Elevated Segment (NES 1): Damansara Damai – Kepong Sentral	5-14
5.4.1.2	Northern Elevated Segment 2 (NES2): Metro Prima – Jalan Ipoh	5-17
5.4.1.3	Underground Segment 1 (UGS1): Jalan Ipoh – Ampang Park East	5-19
5.4.1.4	Underground Segment 2 (UGS2): KLCC East – Bandar Malaysia South	5-21
5.4.1.5	Southern Elevated Segment 1 (SES1): Bandar Malaysia South – UPM	5-24
5.4.1.6	Southern Elevated Segment 2 (SES2): UPM – Putrajaya Sentral	5-28
5.4.1.7	Land Use at Depot Area	5-30
5.4.2	Future Land Use	5-32
5.4.2.1	Northern Elevated Segment	5-32
5.4.2.2	Underground Segment	5-32
5.4.3	Southern Elevated Segment 1	5-33
5.4.3.1	Southern Elevated Segment 2	5-33
5.5	CLIMATE	5-34
5.5.1	Rainfall	5-34
5.5.2	5.5.2 Temperature	5-34
5.5.3	Relative Humidity	5-34
5.5.4	Surface Wind	5-34
5.6	HYDROLOGY AND WATER RESOURCES	5-35
5.6.1	Rivers	5-35
5.6.2	Drainage System and River Crossing	5-36
5.6.3	Flood Prone Areas	5-37
5.7	WATER QUALITY	5-39
5.8	AIR QUALITY	5-47
5.9	NOISE AND VIBRATION	5-49
5.9.1	Noise Levels	5-49
5.9.2	Vibration Level	5-62
5.10	ROAD TRAFFIC CONDITION	5-67
5.11	SOCIO ECONOMIC ENVIRONMENT	5-77
5.11.1	Regional Context	5-77
5.11.1.1	Social Profile of the SSP Line Impact Zone	5-78
5.11.1.2	Total Population and Distribution	5-78
5.11.1.3	Households and Living Quarters	5-82
5.11.2	Ethnic and Gender Distribution	5-83
5.11.3	Age Composition	5-85
5.12	ECOLOGY	5-89

## TABLE OF CONTENTS

---

### SECTION 6 : PERCEPTION SURVEY AND STAKEHOLDER FEEDBACK

6.1	INTRODUCTION	6-1
6.2	PUBLIC PERCEPTION SURVEY	6-1
6.2.1	Survey Methodology	6-2
6.2.2	Socio Economic Characteristics of Respondents	6-3
6.2.3	Transport Mode and Travel Time	6-7
6.2.4	Satisfaction with Existing Neighbourhood	6-9
6.2.5	Awareness of and Support for SSP Line	6-12
6.2.6	Positive and Negative Perceptions	6-17
6.2.7	Perceptions on Effectiveness of Mitigating Actions	6-27
6.2.8	Preferred Communications Media	6-31
6.3	STAKEHOLDERS' ENGAGEMENT	6-32
6.3.1	Feedback from Stakeholders' Engagements	6-34
6.3.2	Summary of Feedback from Stakeholders' Engagements	6-56

### SECTION 7 : POTENTIALLY SIGNIFICANT IMPACTS AND MITIGATION MEASURES DURING THE CONSTRUCTION STAGE

7.1	INTRODUCTION	7-1
7.2	SENSITIVE RECEPTORS	7-1
7.3	POTENTIALLY SIGNIFICANT IMPACTS AND MITIGATION MEASURES DURING PRE-CONSTRUCTION STAGE	7-1
7.3.1	Land and Property Acquisition	7-1
7.3.2	Utilities Relocation	7-4
7.4	POTENTIALLY SIGNIFICANT IMPACTS AND MITIGATION MEASURES DURING THE CONSTRUCTION STAGE	7-6
7.5	TRAFFIC CONGESTION	7-7
7.5.1	Traffic Impacts Due To Station and Alignment Construction	7-7
7.5.2	Traffic Impacts Due To Depot Construction	7-13
7.5.3	General Management Measures To Minimise Traffic Congestion	7-17
7.5.4	Specific Management Measures To Minimise Traffic Congestion	7-18
7.6	NOISE IMPACTS	7-19
7.7	VIBRATION	7-50
7.8	GEOTECHNICAL HAZARDS AND CONSTRUCTION RISKS	7-53
7.8.1	Construction Risks due to Variable Soil Conditions	7-54
7.8.2	Construction Risks - Excavation & Construction of Retaining Wall	7-55
7.8.3	Construction Risks due to Tunneling Work In Kenny Hill and Limestone Formation	7-58
7.8.4	Construction Risks due to Piling Works in Jelebu Schists, Hawthornden Schists and Granite Formation	7-60
7.8.5	Construction risks during piling works in Kenny Hill Formation	7-61
7.8.6	Construction risks during piling works in Limestone Formation	7-61
7.8.7	Groundwater Regime	7-62
7.9	PUBLIC SAFETY	7-63
7.9.1	Hazard Identification	7-64
7.10	AIR QUALITY	7-72
7.10.1	Dust from Depot Construction	7-72
7.10.2	Air Pollution from Other Construction Activities	7-80

## TABLE OF CONTENTS

---

7.11	SOIL EROSION AND SEDIMENTATION	7-85
7.11.1	Depot Construction	7-85
7.11.2	Underground Works	7-88
7.11.3	Elevated Works	7-88
7.12	FLOODING	7-94
7.12.1	Depot Construction	7-94
7.12.2	Underground Works	7-94
7.12.3	Elevated Works	7-94
7.13	IMPACT ON WATER QUALITY	7-96
7.14	WASTE GENERATION	7-101
7.15	SOCIAL IMPACTS DURING CONSTRUCTION STAGE	7-104

## SECTION 8 : POTENTIALLY SIGNIFICANT IMPACTS AND MITIGATION MEASURES DURING THE OPERATIONAL STAGE

8.1	INTRODUCTION	8-1
8.2	SENSITIVE RECEPTORS	8-1
8.3	POTENTIALLY SIGNIFICANT IMPACTS	8-1
8.4	NOISE IMPACTS	8-2
8.4.1	Acceptable Noise Limits	8-2
8.4.2	Methodology	8-5
8.5	VIBRATION	8-126
8.5.1	Acceptable Limits for Vibration	8-126
8.5.2	Predicted Vibration Levels	8-127
8.5.3	Vibration Assessment	8-131
8.5.4	Vibration Mitigation Measures	8-134
8.6	TRAFFIC IMPACTS	8-137
8.6.1	Alleviation of Traffic Congestion	8-137
8.6.2	Localised Congestion Around Stations	8-140
8.7	VISUAL IMPACTS	8-150
8.7.1	Introduction	8-150
8.7.2	Methods of Assessment	8-150
8.7.3	Visual Impact along the SSP Line	8-154
8.7.4	Measures to Minimize Visual Impact	8-162
8.8	AIR QUALITY	8-169
8.8.1	Air Quality Improvement Along SSP Corridor	8-169
8.8.1.1	Methodology - CALINE4 Air Quality Model	8-169
8.8.1.2	Predicted Air Quality	8-173
8.8.2	Air Quality Changes at Stations	8-180
8.8.2.1	Results of the Analysis	8-180
8.8.3	Emission Avoidance	8-198
8.9	SOCIAL-ECONOMIC IMPACTS	8-199
8.9.1	Impacts to Communities Located Close to the Alignment and Station	8-199
8.9.2	Social and Economic Benefits for the Wider Conurbation	8-201
8.9.3	Land Use Changes	8-204
8.10	PUBLIC SAFETY	8-204
8.10.1	Hazard and Risk Identification	8-205
8.10.2	Safety Management	8-208
8.11	FLOODING	8-211
8.12	IMPACTS FROM DEPOT OPERATION	8-212

## **TABLE OF CONTENTS**

---

### **SECTION 9 : RESIDUAL IMPACT**

9.1	INTRODUCTION	9-1
9.2	SOCIO-ECONOMIC IMPACTS	9-1
9.3	NOISE AND VIBRATION IMPACTS	9-2
9.4	TRAFFIC CONGESTION	9-2
9.5	VISUAL IMPACT	9-4

### **SECTION 10 : ENVIRONMENTAL MANAGEMENT FRAMEWORK**

10.1	INTRODUCTION	10-1
10.2	ENVIRONMENTAL MANAGEMENT POLICY	10-1
10.3	ORGANIZATION STRUCTURE	10-3
10.3.1	Roles and Responsibility	10-3
10.3.2	Lines of Communication	10-6
10.4	EXTERNAL COMMUNICATION	10-7
10.4.1	Communication Channels	10-7
10.4.2	Community and Stakeholder Consultation	10-8
10.4.3	Complaints	10-9
10.5	ENVIRONMENTAL MONITORING PROGRAMME	10-10
10.6	ENVIRONMENTAL REPORTING	10-19
10.7	EMERGENCY RESPONSE PLAN	10-20

### **SECTION 11 : CONCLUSION**

11.1	INTRODUCTION	11-1
11.2	POTENTIAL SIGNIFICANT IMPACTS AND MITIGATION	11-1
11.3	BENEFITS	11-3

### **LIST OF APPENDICES**

<b>APPENDIX A</b>	REFERENCES
<b>APPENDIX B</b>	DEIA CHECKLIST
<b>APPENDIX C</b>	TERMS OF REFENCES APPROVAL
<b>APPENDIX D</b>	BASELINE LABORATORY ANALYSIS REPORT
<b>APPENDIX E</b>	SOCIO- ECONOMIC ASSESSMENT REPORT

## TABLE OF CONTENTS

---

### LIST OF ABBREVIATIONS

AKLEH	Ampang – Kuala Lumpur Elevated Highway
AMS	American Meteorological Society
BOD	Biochemical Oxygen Demand
CBD	Central Business District
CMS	Complaint Management System
COD	Chemical Oxygen Demand
DBKL	Dewan Bandaraya Kuala Lumpur
DID	Drainage and Irrigation Department
DO	Dissolved Oxygen
DOE	Department of Environment
DOSH	Department of Occupational Safety and Health
DUKE	Duta-Ulu Klang Expressway
EIA	Environmental Impact Assessment
EMP	Environmental Management Plan
ERP	Emergency Response Plan
ESCP	Erosion and Sedimentation Control Plan
ETP	Economic Transformation Programme
FGD	Focus Group Discussion
FMM	Federation of Malaysian Manufacturers
GKL/KV	Greater Kuala Lumpur/Klang Valley
GKL/KV PTMP	Greater KL/ Klang Valley Public Transport Master Plan
GNI	Gross National Income
HSR	High Speed Rail
HKL	Hospital Kuala Lumpur
LOS	Level of Service
LRT	Light Rail Transit
MAAQG	Malaysian Ambient Air Quality Guidelines
MARDI	Malaysian Agricultural Research and Development Institute
MBPJ	Majlis Bandaraya Petaling Jaya
MPS	Majlis Perbandaran Selayang
MPSp	Majlis Perbandaran Sepang
MPSJ	Majlis Perbandaran Subang Jaya
MRT	Mass Rapid Transit
MRT Corp	Mass Rapid Transit Corporation
NKEA	National Key Economic Areas
NWQS	National Water Quality Standards
OCC	Operations Control Centre
PAT	Penilaian Awal Tapak
PDP	Project Delivery Partner
PM <sub>10</sub>	Particulate Matter less than 10 µm
PPJ	Perbadanan Putrajaya
PPKB	Perbadanan Pembangunan Kampong Bharu

## TABLE OF CONTENTS

---

PTMP	Public Transport Master Plan
RQD	Rock Quality Designation
ROW	Right Of Way
SAMM	Skim Akreditasi Makmal Malaysia
SBK Line	Sungai Buloh – Kajang Line
SSP Line	Sungai Buloh – Serdang – Putrajaya Line
SHE Unit	Safety, Health & Environmental Unit
SPAD	Suruhanjaya Pengangkutan Awam Darat
TBM	Tunnel Boring Machine
TCR	Total Core Recovery
TMP	Traffic Management Plan
TNB	Tenaga Nasional Berhad
TOD	Transit Oriented Development
TOR	Terms of Reference
TSP	Total Suspended Particulates
TSS	Total Suspended Solids
TUDM	Tentera Udara DiRaja Malaysia (Royal Malaysian Air Force)
UPM	Universiti Putra Malaysia
US EPA	United States Environmental Protection Agency
WPC	Work Package Contractors
WQI	Water Quality Index

Chart 8-89	Predicted vibrations in 2 stories houses 30m from viaduct pier (good wheels and track conditions)	8-132
Chart 8-90	Predicted vibrations in 1 <sup>st</sup> floor high rise condo 15m from viaduct pier (good wheels and track conditions)	8-133
Chart 8-91	Predicted vibrations in 1 <sup>st</sup> floor high rise condo 30m from viaduct pier (good wheels and track conditions)	8-133
Chart 8-92	Methodology for Traffic Emissions Assessment	8-170
Chart 8-93a	Predicted 1-hour Averaging Time Iso-contours for Carbon Monoxide	8-174
Chart 8-93b	Predicted 1-hour Averaging Time Iso-contours for Carbon Monoxide	8-175
Chart 8-93c	Predicted 1-hour Averaging Time Iso-contours for Carbon Monoxide	8-176
Chart 8-94a	Predicted 1-hour Averaging Time Iso-contours for Nitrogen Dioxide	8-177
Chart 8-94b	Predicted 1-hour Averaging Time Iso-contours for Nitrogen Dioxide	8-178
Chart 8-94c	Predicted 1-hour Averaging Time Iso-contours for Nitrogen Dioxide	8-179
Chart 8-95a	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S04 (Kepong Sentral)	8-182
Chart 8-95b	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S04 (Kepong Sentral)	8-183
Chart 8-96a	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S09 (Kampung Batu)	8-184
Chart 8-96b	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S09 (Kampung Batu)	8-185
Chart 8-97a	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S10 (Kentomen)	8-186
Chart 8-97b	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S10 (Kentomen)	8-187
Chart 8-98a	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S11 (Jalan Ipoh)	8-188
Chart 8-99b	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S11 (Jalan Ipoh)	8-189
Chart 8-100a	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S30 (Taman Universiti)	8-190
Chart 8-100b	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S30 (Taman Universiti)	8-191
Chart 8-101a	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S31 (Equine Park)	8-192
Chart 8-101b	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S31 (Equine Park)	8-193

## TABLE OF CONTENTS

---

Chart 8-102a	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S33 (16 Sierra)	8-194
Chart 8-102b	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station S33 (16 Sierra) (Cont'd)	8-195
Chart 8-103a	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station 34 (Cyberjaya North)	8-196
Chart 8-103b	Predicted 1-hour Averaging Time Iso-contours for CO and NO <sub>2</sub> at Station 34 (Cyberjaya North)	8-197
Chart 10-1	Overall Project Organization Structure	10-4
Chart 10-2	Standard and Compliance Department Organization Chart (MRT SBK Line and SSP Line)	10-6
Chart 10-3	Procedure for Complaint Management System	10-10
